

Einkochwelt®

Jars, bottles and accessories for homemade goods:
Original WECK®, Bormioli Rocco,
Luigi Bormioli and Le Parfait.

2024

With the registered brand Einkochwelt® we offer you a graphically aligned conception for preserving and for homemade food. Einkochwelt® offers you flexible, attractive and promotional POS solutions.

Einkochwelt® is a perfect range of products for homemade marmalades, jams, jellies, juices, liqueurs, vegetables and all kinds of preserves. In addition to that with Einkochwelt® your clients find everything they need for the new trend of baking in jars as well as for appetizers and desserts.

You can choose between different shapes of jars and bottles and between products of the traditional German brand WECK®, the Italian brand Bormioli or other well-known glass producers. The assortment is completed by many different accessories such as passing cloths, replacement lids for twist-off jars, labels and deco cards that help you to turn your preserves into individual gift ideas.

On the following pages we would like to introduce you to our latest selection of Einkochwelt® products such as POS solutions for trays, displays and listing products for all-season placement.

Here you find further product information and instruction for use: www.einkochwelt.com/instructions.html

FERMENTATION

Already 6000 BC man used fermentation to keep vegetables, meat and fish durable. Thus fermentation is one of the most ancient methods of conservation without using external energy.

If you leave food for a while it changes its smell, structure and taste – microbes tamper it and normally it perishes. Fermentation is the regulation of this process in a controlled manner. Bacteria or fungi, so called „good organisms“, decompose food into its parts as nutrients.

During the fermentation process food changes its taste in a positive way. Not only new and complex flavours are developed, but food also becomes more digestible. Well known fermented food products are sauerkraut, marinated salmon, yoghurt, coffee, tea, beer and the Co-rean traditional dish kimchi.

Today we rediscover native methods, appreciate homemade food and try to find a new variety of taste. Moreover fermentation is sustainable and resource-saving as it works in an absolutely natural manner without any external energy like cooling or heating.

And now enjoy discovering and tasting fermentation,

Heiko Antoniewicz

WHO IS HEIKO ANTONIEWICZ?

Heiko Antoniewicz is a German chef, HoReCa influencer, author and product designer. Even several years ago, running his own „star-chef“ restaurant, he started being on the track of culinary trends or rather created them looking for new ones. Therefore he combines classic culinary craftsmanship, modern science, traditional methods and innovative techniques. His books are highly considered benchmark and internationally decorated. He passes his knowledge in coachings to award-winning chefs and ambitious hobby chefs. He is considered a fermentation pioneer for years.

My herb garden

Original WECK® round rim jars with wooden lid (beech) and shovel (beech). Ideal for spices and dried herbs. Placement at the POS as cardboard chute width x depth 80 x 40 cm. Available in two placement versions of 80 – 1000 ml.

Zero waste

Unpacked shopping is more than a trend. It's a basic attitude to deal with food in a sustainable way with less packaging. Available as POS cardboard chute with original WECK® round-rim jars, beech-wood lids and small wooden shovels or as display solution (cardboard, 80 x 60 cm) with an extended article assortment.

Fermentation

The oldest method of conservation currently enjoys a boom. The great thing is it works without additional energy, is very simple and offers exciting taste experiences. With our WECK® or Le Parfait starter kits you can try out fermentation easily at home.
